

## The DBS app: Go mobile for a truly on-the-go experience!

Access our tools on your mobile device! With the DBS app, you'll be able to not only run a FASTerm quote, but also drop a ticket on the go!

Visit our website on your **Android™** or **Apple™** device: [www.dbs-lifemark.com](http://www.dbs-lifemark.com) and follow the prompts!

### WHY GO MOBILE?

You asked. We listened! Advisors wanted to be able to drop a ticket in addition to running a quote while on the go. Our app allows for that! And, it's a PWA, giving us greater flexibility in the tools offered, and it will have the same look and feel as our website!

### WHAT'S A PWA?

PWA stands for Progressive Web App. It is a website that is essentially "bookmarked" onto a user's mobile home screen, giving it the look and feel of a native app with enhanced web capabilities.

### What are the benefits of using the app?

PWAs give the user the best of both worlds and provide the user with greater benefits than an app or web page alone:

**Run term quotes** right from your smart phone, and now you can **drop a ticket too!**

Finish the application when it's convenient for you!
