

## INTRODUCING... A newly redesigned DBS Mobile APP!

We're excited to announce a new user experience for accessing our tools on your mobile device. With the new app, you'll be able to not only run a FASTerm quote, but also drop a ticket on the go!

Visit our website: [www.dbs-lifemark.com](http://www.dbs-lifemark.com) on your mobile device and follow the prompts!

### WHY THE SWITCH?

You asked. We listened! Advisors wanted to be able to drop a ticket in addition to running a quote while on the go. Our new app allows for that! And, it's a PWA, giving us greater flexibility in the tools offered, and it will have the same look and feel as our website!

### WHAT'S A PWA?

PWA stands for **Progressive Web App**. It is a website that is essentially "bookmarked" onto a user's mobile home screen, giving it the look and feel of a native app with enhanced web capabilities.

### WHAT ARE THE BENEFITS OF A PWA?

PWAs give the user the best of both worlds and provide the user with greater benefits than an app or web page alone:

**Faster loading times:** PWAs generally use less data than a native app and caching to allow animations, navigation and scrolling to work seamlessly

**No updates required:** any updates for PWA happen "on use" just as if you were using a web browser. Anything we change on our website will also be updated on our app.
